**4.** Make sure your touch frame is connected to both USB and Power and open Dashboard. Your touch device will automatically be detected by the software. Click on **configuration**.

**5.** In the left-hand pane, scroll down and click on **Transformations**, then click the **reset** button. After the calibration has been reset, click on the **calibrate** button.

**7.** Starting outside of the circles, drag your finger to the center of the crosshairs when prompted. To cancel and restart, click on or tap abort.

8. After calibration, be sure to click on Apply to save the changes.
