4. Make sure your touch frame is connected to both USB and Power and open Dashboard. Your touch device will automatically be detected by the software. Select the **Three Horizontal Lines** at the top left corner.

5. From **File Options**, select **Save Configuration File**. It is best practice to <u>not</u> change the file name of the Configuration File.

6. Configuration Files can be loaded to other Baanto devices **That are the Same Size and Model**. To do this, follow previous steps and select **Load Configuration File**, choose the Configuration File you want loaded to your Device.

7.If the above steps do not resolve the issue, please contact the TSI Touch Customer Service team at 802-874-0123 Option 2; email: support@tsitouch.com; or by visiting our TSI Touch website and clicking on the red "Help" icon in the lower right corner of the webpage.
