

GRBS PROTECTIVE SOLUTION

46" Integrated Video Wall Display

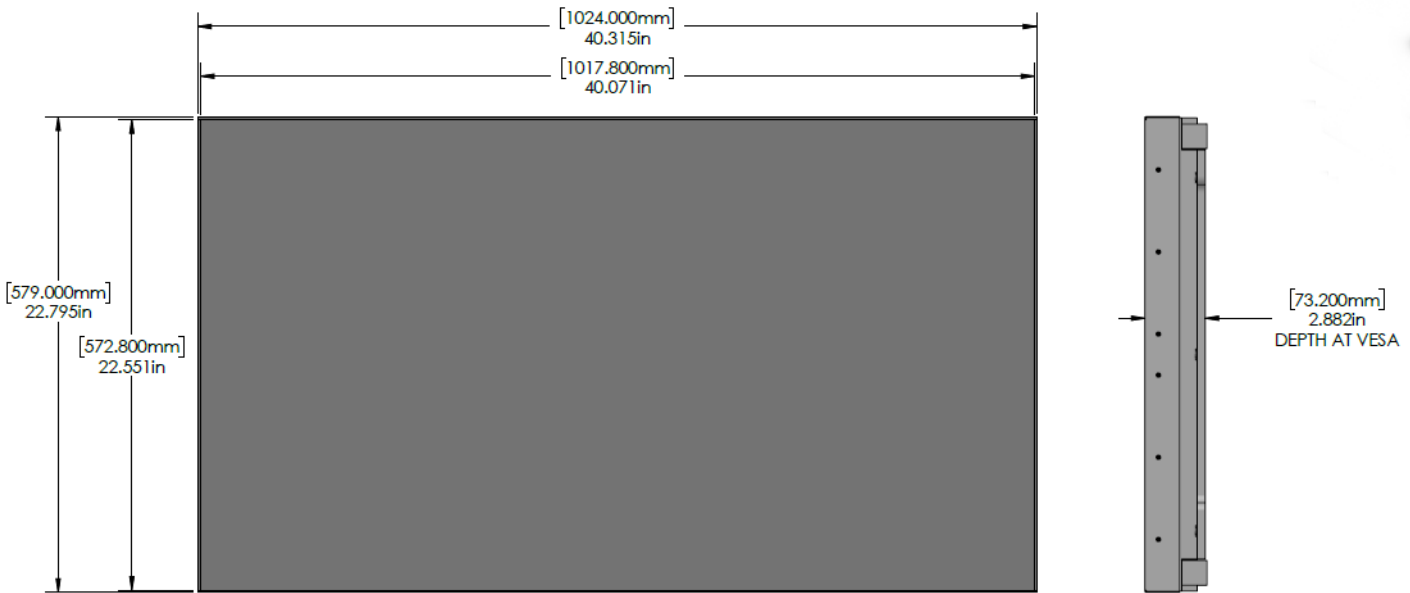

TSI Touch's patented Glass Retention Bezel System (GRBS) with laminated glass for Samsung®'s 46" VM46B-U display provides superior protection for the display while maintaining a narrow bezel and low profile.

Our cold rolled steel GRBS, combined with a laminated anti-glare glass, can withstand physical impact and frequent cleanings, while protecting the display. The lamination on the glass provides an added layer of protection, and helps prevent glass from scattering in the event of breakage.
