LG | Business Solutions

ShadowSense™ Interactive Solution

ShadowSense™ based solutions which allow for unparalleled performance when compared to any other interactive technology. Features such as superior palm rejection algorithms combined with the ability to accurately detect shape and size of touch objects create an unrivaled user experience. These features allow ShadowSense™ solutions to accurately detect the touching objects such as a pen/stylus, user's fingers, palm, or a special eraser, and report this data to the operating system.

Multi-Touch Screen
 True multi-touch support with 6 or 10 simultaneous touch points for all major operating systems

Easy Integration
 Unrivaled simplicity makes installation easier and faster

Ultra-Fast Response Time
 Allows for split second reactions between touch point and screen

HID Compliant
 Maximum compatibility with numerous operating systems, plug-and-play

Superior Design
 Full steel chassis combined with tempered glass provides additional protection to the LCD panel

Sunlight Immune
 Enhanced filtering and analogue sensors allow operation in bright conditions up to full sunlight
