

CURVED TOUCH FOR LED VIDEO WALLS

In today's digital landscape, interactive displays have become essential tools for engaging audiences and enhancing user experiences. With the introduction of curved displays, a new dimension of immersion and engagement has emerged, presenting unique opportunities for interactive technology. TSI Touch is at the forefront of this innovation with our curved touch solution, designed to seamlessly integrate with curved video wall displays and elevate interactive experiences to new heights.

BENEFITS OF CURVED TOUCH

- **Immersive Engagement:** Display curvature enhances the viewing experience by enveloping viewers in content, creating a more immersive and captivating environment. With our curved touch solution, users can interact with content in a natural and intuitive way, further enhancing engagement and retention.
- **Improved Visibility:** Curved displays offer better clarity and reduced distortion, ensuring that content remains clear and legible from various viewing angles. Whether it's a presentation in a boardroom or digital signage in a retail environment, our curved touch solution ensures that users can easily access and interact with content without compromising visibility or readability.
- **Space Optimization:** Curved displays allow for more efficient use of space, especially in environments where floor space is limited. By utilizing the curvature of the display, our curved touch solution maximizes interactive surface area without requiring additional physical space, making it ideal for applications where space is at a premium.
- **Enhanced Aesthetics:** Beyond functionality, curved displays offer a sleek and modern aesthetic that elevates the visual appeal of any environment. our curved touch solution seamlessly integrates with curved displays, enhancing their visual appeal while adding interactive functionality.
- **Differentiation and Innovation:** Incorporating curved touch technology into interactive displays sets businesses apart from competitors and demonstrates a commitment to innovation and cutting-edge technology. By offering interactive experiences on curved displays, businesses can capture attention, drive engagement, and leave a lasting impression on customers, clients, and stakeholders.

APPLICATIONS

- **Retail:** Create immersive product displays, interactive kiosks, and engaging brand experiences to captivate customers and drive sales.
- **Corporate:** Elevate presentations, collaboration, and brainstorming sessions with interactive conference room displays and collaborative workspaces.
- **Hospitality:** Enhance guest experiences in hotels, resorts, and entertainment venues with interactive wayfinding, concierge services, and entertainment options.
- **Education:** Foster interactive learning environments in classrooms and educational institutions with interactive whiteboards, presentations, and collaborative learning tools.
- **Healthcare:** Improve patient engagement and communication in hospitals and healthcare facilities with interactive patient education, wayfinding, and entertainment solutions.
- **Events and Exhibitions:** Engage attendees at trade shows, conferences, and events with interactive booths, presentations, and immersive brand experiences.
- **Public Spaces:** Enhance public engagement and communication in transportation hubs, museums, and government buildings with interactive information kiosks, maps, and exhibits.
- **Broadcasting and Media:** Revolutionize broadcast presentations and media interactions with immersive touch experiences on curved displays, enhancing audience engagement and interactivity.

TSI Touch's curved touch solution offers a revolutionary approach to interactive displays, unlocking new possibilities for engagement and immersion. Whether you're looking to enhance the customer experience, streamline operations, or communicate more effectively, our curved touch solution is the ideal choice for transforming curved LED video wall displays into interactive hubs of innovation and engagement.
