

DEFENDER

PRESERVE THE BRILLIANCE OF DVLED DISPLAYS

TSI Touch is proud to offer a new protective solution specifically designed for large format Direct View LED displays. As with all of our solutions, the Defender is engineered to safeguard your investment and ensure the longevity of your DVLED video wall displays.

The Perfect Fit for Your Display

Our protective solution is meticulously crafted to seamlessly integrate with DVLED displays, with sizes beginning at 120 inches and providing a sleek and professional look. The precision-engineered design ensures a perfect fit, maintaining the display's aesthetics while offering maximum protection.

Durable and Reliable

Our protective solution is built to withstand the rigors of daily use in high-traffic environments. Constructed from premium materials, Defender offers exceptional durability and protects your investment against scratches, impacts, and other potential damage.

Elevate Your Display Experience

With the Defender, you can have peace of mind knowing that your Direct View LED display is safeguarded against potential hazards. Enhance the longevity and performance of your display while maintaining its stunning visual appeal.

APPLICATIONS

Corporate Spaces: Elevate the professionalism of boardrooms and conference centers with this protective solution. Ensure your DVLED display remains pristine, even in high-traffic areas where it's exposed to constant interaction.

Retail Environments: In retail, first impressions are critical. The Defender not only shields your display from accidental bumps and scratches but also maintains its vibrant visuals. Showcase products, promotions, and brand messaging with confidence.

Education: Protect your DVLED display in busy educational settings and athletic facilities with TSI Touch. Our solution ensures durability, preserving a clear and engaging learning experience that can withstand frequent use by students, faculty, and visitors.

Hospitality & Entertainment: Create immersive experiences in hotels, resorts, and entertainment venues with a DVLED display. Our solution protects your investment, ensuring guests enjoy uninterrupted entertainment and information.

Digital Signage: Transform your displays into an attention-grabbing digital signage solution. The Defender maintains the clarity of advertisements and information displays in high-traffic areas, enhancing brand visibility.

Healthcare Facilities: Clear communication is vital in healthcare settings. TSI Touch's protective solution helps safeguard patient instructions and wayfinding signage on DVLED displays used to disseminate information.

Transportation Hubs: A DVLED display can be a focal point in transportation hubs such as airports and train stations. The Defender protects against wear and tear, ensuring travelers receive timely and accurate information.

Defender, the newest protective solution from TSI Touch, redefines display protection with its innovative design. Crafted from premium materials, this solution seamlessly integrates with LED wall displays, maintaining aesthetics while enduring high-traffic environments. What distinguishes Defender is its user-friendly maintenance approach. Its patent-pending design features large panels that swing open for easy access, minimizing downtime and enhancing longevity. *For customization options and premium features, ask us about our Defender Pro Series, offering bespoke solutions tailored to your specific needs.*
