

## 32" SOLAR POWERED WIRELESS E INK POSTER

The Solis™ 32 is a full-color, solar-powered e-paper display that installs like a poster and runs completely cable-free. With simple mobile setup, remote CMS integration, and zero maintenance required, it's the future of sustainable signage.

### Key Features

#### No Cables or Battery Charging Required

The Solis™ 32 is completely wireless and self-sustaining. Once mounted, it requires no power cables, charging stations, or manual upkeep — making it ideal for locations where traditional digital signage is impractical. Reduce installation costs and eliminate ongoing labor for a better ROI.

#### Truly Sustainable Signage

With no printing, no electricity usage, and no battery waste, the Solis™ 32 is one of the most environmentally responsible signage solutions available today. It helps organizations advance ESG initiatives while eliminating waste, shipping costs, and energy consumption.

#### Simple Setup & Smart Scheduling

Install and configure displays in minutes using the EPD Tool™ mobile app for iOS and Android. Easily schedule when content appears on screen and automate changes by time of day or day of week.

#### CMS Compatible

Manage content your way. Solis™ displays integrate with existing CMS platforms supporting both web-based tools and API-driven workflows.

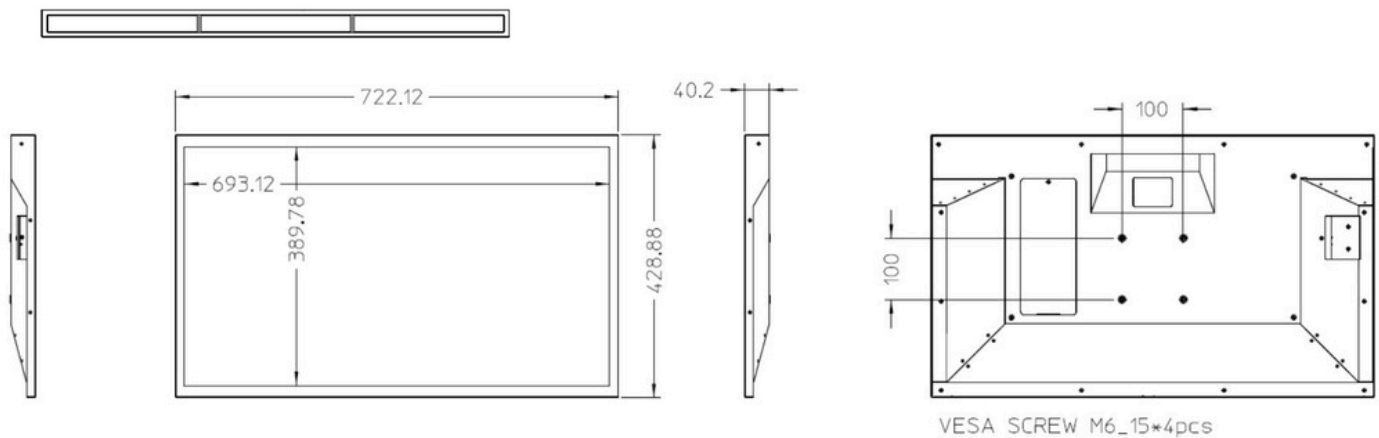

#### Powered by E Ink Spectra™ 6 Technology

Deliver stunning content with crisp resolution and vibrant color. The Solis™ 32 features a 2560x1440 pixel display with support for 65,000+ colors — offering the premium look of print with the flexibility of digital.

## 32" Solar Powered Wireless E Ink Poster
